PROFESSIONAL SUMMARY

Product Manager with 3+ years of on site industry experience bridging stakeholder requirements and technical delivery across healthcare and aviation sectors. Skilled in Jira administration, agile project management, Product Enhancements, and automations.

PROFESSIONAL EXPERIENCE

PRACTICE EHR

May 2025 – Present

Product Manager

- Own agile delivery at Practice EHR, administer Jira across 7 teams, run all sprint ceremonies, and translate stakeholder requests into groomed, dev-ready backlog items.
- Lead AI feature initiatives for the EHR product, scoping, prototyping, and handing off capabilities from concept to dev-ready specification.
- Authored the Surescripts e-prescribing certification workflow documentation and interactive prototype covering 33 ACR message flows within a 24-second acknowledgment budget.
- Designed an AI Scribe workflow: provider-customizable pre-visit instructions plus per-section and whole-note regeneration on finished clinical notes.
- Redesigned and shipped the in-product AI Assistant experience; built AI document-summary prototypes for patient documents and medications, and a patient-portal AI Assist concept.
- Established product-wide design standards, a shared design system, company-wide UI/modal spec, User Stories and a Figma design-conformance QA pipeline with automated bug reporting.
- Worked on Projects related to REST APIs, LLM, AI, Machine Learning

AIRBLUE

February 2023 – March 2025

Revenue Management Data Analyst

- Managed end-to-end delivery of data and reporting initiatives, coordinating with cross-functional teams to ensure timely and accurate outputs for revenue decisions.
- Analyzed booking and pricing data to forecast demand and support pricing strategy; built ML models (regression, classification) for KPI tracking and automated reporting.
- Developed a Python bot to fetch, calculate, and benchmark daily airline KPIs against competitors, cutting manual reporting effort significantly.
- Designed Tableau and Power BI dashboards for real-time revenue monitoring and capacity planning; received formal management appreciation for automating the Baggage Revenue Management System.

TPL TRAKKER

January 2022 – February 2023

Software Engineer Intern

- Built internal tools using JavaScript and REST APIs; worked on relational database design and SQL query optimization.
- Contributed to scalable system design, API integrations, code reviews, and SDLC documentation alongside senior engineers.

EDUCATION

Air University, E9 Islamabad - **B.S. Software Engineering (GPA: 3.56/4.0)**

2023

FSC (Pre – Engineering) - **Fauji Foundation College For Boys**

2019

PROJECTS

- **AI Scribe for Practice EHR:** Gathered and documented full requirements for an AI-driven medical scribe tool. Defined use cases, coordinated UI/UX design flows, and translated requirements into developer tasks.
- **Inbound AI Calling Agent: Practice EHR:** Led requirements gathering, authored functional specs, facilitated UI/UX workshops, created user stories, and managed UAT to deliver a streamlined patient intake solution.
- **Jira-to-GitLab Automated Deployment Pipeline:** Configured Jira automation rules linked to GitLab webhooks to trigger hotfix deployments automatically, cutting urgent release time from hours to minutes.

- **Jira Dashboard using Atlassian cloud API:** Created Jira dashboard to customize sprint management, team analytics outside the jira using Java and APIs
- **Airline KPI Automation Bot – Airblue:** Built a Python bot to extract, calculate, and compare daily airline KPIs against competitor benchmarks, reducing manual analyst effort by over 70%

NOTABLE ACHIEVEMENTS

Awarded for Optimizing Revenue Management Through Automation — Airblue

Academic Excellence Award, Final Year Project — Air University (ML-based skin cancer detection using HAM10000 dataset)
